

Hosted Desktop Windows 11 VDI

INTRODUCTION

Experience the power of Windows 11 anytime, anywhere with our Hosted Desktop VDI solution. Designed for seamless productivity, our platform gives organisations the flexibility to access everything they need – on any device, from any location. Streamline IT management, enhance productivity, and ensure top-tier security, all within a single, powerful solution.

KEY FEATURES

Access anywhere: work securely and efficiently from any device with an internet connection. Our solution ensures flexibility while ensuring controlled access to data, whether you're in the office, at home, or travelling your work is always accessible.

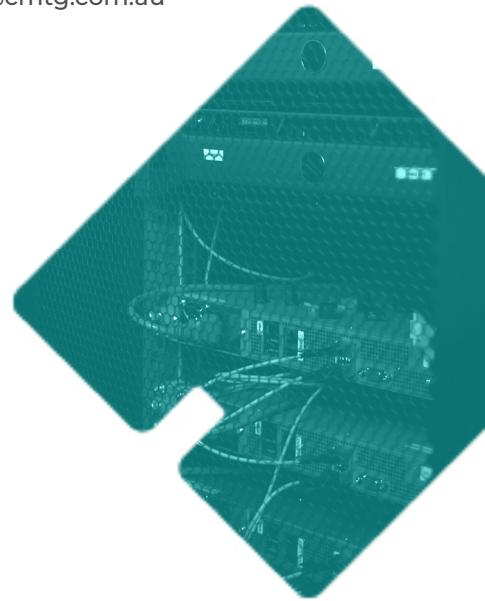

Performance-optimised: Windows 11 ensures a seamless and optimised performance. The solution is designed to deliver a fast and reliable environment for all tasks.

Scalable: as your business grows, the Hosted Desktop VDI scale to accommodate new users and workloads. Easily add or remove users to match your business needs.

Enhanced security: security is built into the core of the Hosted Desktop VDI. Multi-factor authentication and end-to-end encryption features are utilised to ensure your data is safe from cyber threats and unauthorised access.

Integration: Windows 11 seamlessly integrates with CoPilot, giving users direct access to generative AI, for tasks such as searching and creating content.

Customisable: tailor your desktop environment to suit your specific workflows and business needs. Customised options have been designed to enhance productivity, allowing you to take control over settings and applications.

BENEFITS OF USING CMTG'S HOSTED DESKTOP WINDOWS 11 VDI

Security

Protect your sensitive company data and applications with enhanced security features. The Hosted Desktop VDI solution strengthens identity verification processes, reducing the risk of unauthorised access, ensuring your business operates securely.

Disaster recovery

All data and applications are safely stored in the cloud, where your business can quickly recover in case of system failures, ensuring business continuity and reducing the risk of data and loss in the cloud.

Increased productivity

The Windows desktop experience enhances productivity for your entire team, with users being able to access all the tools and applications needed to work efficiently.

Ease of use

An intuitive interface, minimal learning curve, seamless updates, and instant access, Windows 11 VDI empowers IT teams to manage all updates, patches, and security behind the scenes, so users can stay focused on what matters.

Cost savings

Delivers major cost savings by reducing maintenance, power use, and the need for expensive hardware upgrades. With CMTG's cloud-based VDI, processing happens off-device, extending the life of existing equipment and delaying costly replacement cycles.

Compliance

Meets strict industry standards for data security and privacy by keeping information secure and centralised in the cloud. It simplifies compliance, accelerates audit readiness, enforces consistent security policies, and reduces the risk of breaches or regulatory penalties.

Remote access

Whether you're working from home, travelling or in the office, our Windows 11 Hosted Desktop ensures you stay connected and productive. This solution is an ideal solution for organisations with BYOD (Bring your own device) policies.
