BAYSWATER CHILDCARE CASE STUDY

The Brief

BCCA, a leading operator of childcare centres, recognised the urgent need to strengthen its cyber security posture and modernise data governance. With regulatory scrutiny intensifying and cyber threats becoming more sophisticated, the organisation required a proactive, scalable solution to safeguard sensitive information and ensure full compliance with evolving sector standards.

Peace of Mind

CMTG Approach

CMTG anticipated a significant uplift in cyber security expectations across the childcare sector. By identifying early vulnerabilities and mapping BCCA's environment against emerging compliance requirements, we designed a strategy to not only close immediate gaps but also position BCCA as a leader in security readiness. Our forward-leaning approach prioritised risk reduction, resilience, and future-proofing their technology landscape.

The Solution

CMTG delivered a full cyber security uplift, integrating enterprise-grade technologies into a cohesive, managed environment:

- Modern device management: A fully managed Microsoft Intune environment to centralise and enforce device security policies
  Next-generation endpoint protection: Deployment of Fortinet EDR to safeguard all endpoints with advanced threat detection and response

  Stronger network defence: Replacement of legacy firewalls with UTM-enabled FortiGate appliances, enhancing perimeter security and providing full network visibility

  Future-ready infrastructure: A complete hardware refresh, including upgrades from Windows 10 to Windows 11, ensuring compliance with current support timelines and alignment with modern security standards

This uplift has placed BCCA in a position of strength, setting a benchmark for cyber security maturity within the childcare industry. Crucially, the success of the project was underpinned by the leadership of CEO Sereena, whose advocacy at board level secured organisational buy-in and enabled swift, decisive action.

The Results

When a serious sector-wide incident triggered early intervention by government authorities, compliance reforms were accelerated across childcare providers. Thanks to CMTG's foresight and rapid execution, BCCA was already ahead of the curve. Their new environment not only meets but exceeds emerging security requirements, dramatically reducing risk exposure and ensuring uninterrupted operations.

Client Testimonial

"CMTG not only delivered a major cyber security uplift for BCCA, but did so with speed, clarity and professionalism. They guided us through complex decisions, secured full board support, and implemented solutions that will protect our centres for years to come."
